

EDGE SERIES

FIRE ALARM SYSTEMS

**EDWARDS INGENUITY,
ENGINEERED FOR
MID-SIZED APPLICATIONS**

WHERE INNOVATION MEETS EFFICIENCY

Every building should have a highly reliable fire alarm system, yet not all require the cost or complexity that comes with most large-scale fire panels. The Edge Series gives you the remarkable quality of Edwards systems, tailored for mid-sized applications. With faster installation, simpler maintenance, affordable system upgrades, and user-friendly operation, Edge delivers the protection you need, exactly how you need it.

INTUITIVE BY DESIGN

The streamlined, user-friendly interface accelerates navigation to speed up every interaction, from setup, to troubleshooting to event response.

Accessing reports now requires 40% fewer clicks.

TABLET-LIKE INTERFACE

10" LCD touchscreen displays up to 8 events at once, with most functions accessible in just a few clicks.

PURE PERFORMANCE – PERFECTLY SCALED

Designed for mid-scale applications, the Edge Series can adapt as building and system needs change, and, with future software updates enabling panel-to-panel networking, Edge provides a competitive solution for larger applications.

One LED with 5 color options means lower costs.

CUSTOMIZABLE SYSTEM

The Edge Series supports up to 1,000 devices, 30 remote annunciators, 6 standard, programmable virtual switches, and up to 72 physical programmable switches and LEDs.

MIGRATION-READY

The Edge Series works seamlessly with existing initiating and notification devices, wiring, and backboxes from Edwards iO500 and iO1000 systems, making it a cost-effective option for retrofit applications.

RETROFIT KIT

Compatibility with existing Edwards devices, wiring, and backboxes, makes the Edge Series well-suited for retrofits.

ENGINEERED FOR SPEED

With the Edge Series, simplified programming and a reduced need for multiple cable runs mean faster installations with less downtime and more productivity.

EXTENDED WIRE RUNS

Supports longer wire runs than traditional notification circuits, with smaller gauge wire, and without the need for added booster power supplies.

THE EDWARDS SYSTEM ADVANTAGE

REDUCED NUISANCE ALARMS

With Signature
Optica™ Detector

ELECTRICAL MAPPING

Automated for ease of
setup and servicing

ULTRA EFFICIENT

With Genesis™ LED series,
the most energy efficient
appliance in their class

HIGHLY FLEXIBLE

Up to 13+ selectable
configurations for
panel notification
appliance circuits

EQUIPPED FOR THE FUTURE

While the Edge Series is a standout solution for standalone projects, it is designed to advance with future innovations, making it an increasingly versatile solution across diverse properties.

AVAILABLE NOW

*Connected***Safety⁺** **COMPATIBLE**

ConnectedSafety+ is a secure, cloud-based platform that provides remote access to the Edge fire panel and connects Edwards devices to optimize efficiency and reliability

COMING SOON

PANEL-TO-PANEL NETWORKING

Upcoming rollouts will enable networking with up to 24 Edge panels and to EST4.

COMING SOON

INTEGRATED VOICE

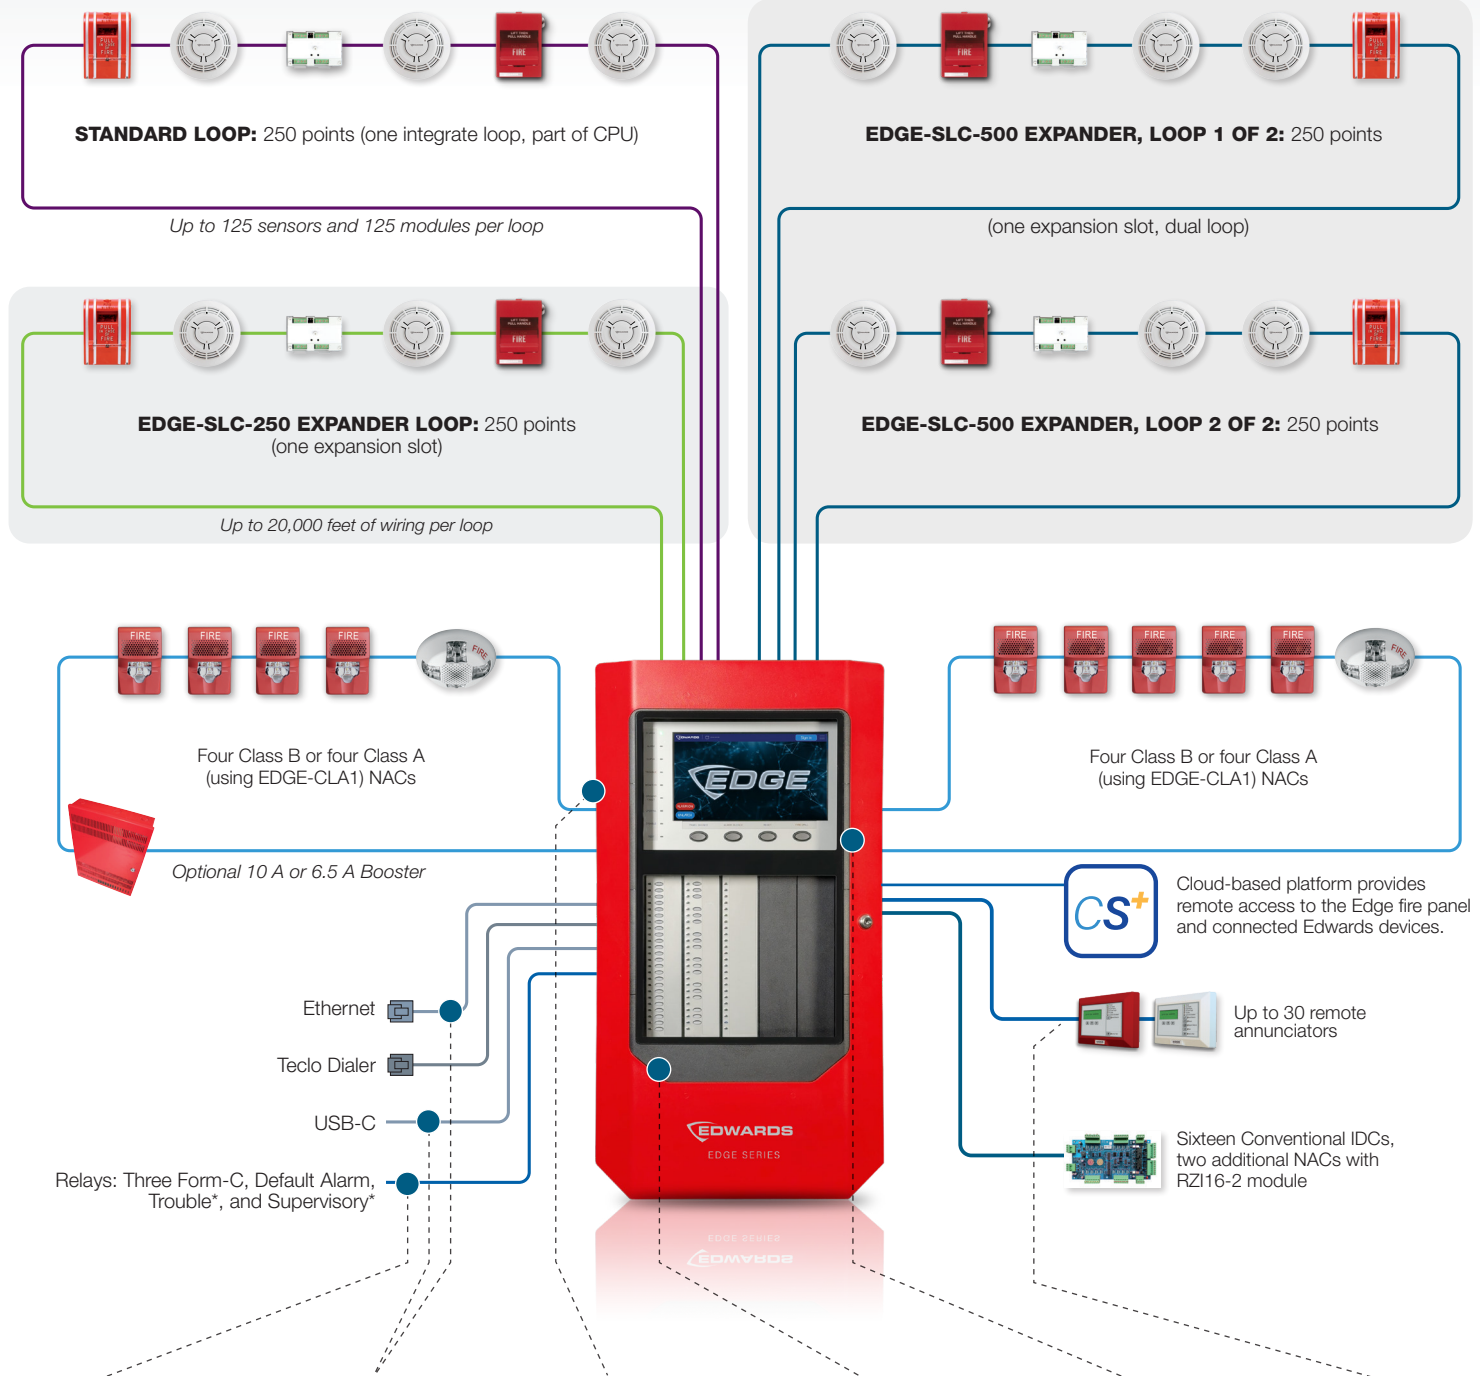

Expect the Edge Series to support the capability for prerecorded and live voice evacuation broadcasts

THE COMPLETE SYSTEM FOR MID-SIZED APPLICATIONS

Flexible and adaptable, the Edge Series enables you to build systems that match each property's requirements. With customizable and expandable options, you can create the ideal solution for each application.

Expandable to three single- or one single- and one-dual device loop modules

2 standard programmable relays

Built-in USB-C and Ethernet (Listed for CMS service) ports

10-amp power supply with Voltage Boost™

Up to 72 programmable physical switches and 5-color LEDs

6 standard, user-programmable virtual switches

30 Remote Annunciators

EDWARDS INGENUITY, ENGINEERED FOR MID-SIZED APPLICATIONS
